cant load phoenixcity: You might wanna try asking on #linux too ill try that... thanks! My pleasure. whats the best nvidia driver for ubuntu 16.10? I believe it's a choice in the additional drivers tool. hi guys !hi hrm im using a asus x205f which has two sata hard drive for storage. i want to run ubuntu 16.04 on the second one, but i can't find a way to identify it from the BIOS. i've tried to change the boot order using the bios, but it is not working Guest50262: There is a little info on that at this pastebin I recommend NOT using the USB-based installer; use the DVD/ISO ;) ah ok, ill try to burn a new disk with that method thanks Always better to go with the DVD ISO, just in case! (You're welcome.) so i need to tell the bios to boot from the usb device when the computer starts? Guest50262: Correct. ok, ill try it, thanks for the help Guest50262: Yep! :) If you have any more questions, feel free to ask! ill be back, thanks You're welcome! :) ok, im back, thanks. i've managed to install ubuntu 16.04, but i have only one sata drive in the motherboard. i want to make the other hard drive, which i can't access in the bios, the boot drive. any ideas? Sure. You'll want to read the guide posted above. 82157476af
