chipping is the most annoying thing about this game but other than that i would recommend. i like the putting although most people dont but thats just because they havent gotten used to it yet because its not really like other games. the gridlines are pretty\u2665\u2665\u2665\u2665\u2665\u2665and dont do much but you can kind of use them to figure out where to aim the ball but really you get used to the greens by playing them a few times. also the difficulty levels are strange but to start with they're good enough to be a good challenge.. Surprisingly fun little puzzle game with appealing visuals and calming audio. Also comes with trading cards and achievements if you care.. If you haven't played this game yet.

Play it.

Period.

Play it.

Favorite game since Skyrim.

Seriously.

Music. Environment (graphics). Creatures. Storyline.

Absolute "yes" in every department.

(I'd tell you more, but that would ruin the magic of discovery)

Also... When you're done with this one, don't forget to check out their "Sub Zero".

But play this first.. Really hard game, gauranteed rage.. Looks can deceive. At first this may look like a children's game but it's difficulty isn't the best possible for a child. 1 hit to the wall and game over. Good game. BIOS is a fast paced, first person running-shooter game, where you run in different areas and shoot machines on walls, or AI's running agens you while getting to the finish line in a short amount of time.

The game is fast, but heavy. Beautiful with UE4 engine, but brutal. The whole goal and idea behind this is to get pass the hard develop strategi maps and get to the finish line in a short amount of time. We have from normal to extreme mode, where the maps are different with different weapons. It gives a decent challenge to the player to remember the AI's spot in the maps while running with a different weapon the moste of the time.

I have to admit, that this is not my cup of tea because i miss the shoot-a-player feeling, but comparing it to other time-based games, then it's just different with a FPS mode. So if you like singleplayer time-based fps games, AI's and machines on walls with either machineguns, laser, rockets, with the hardcore UE4 engine that makes the game beautiful, then this game is for you.

Here is a demo:

<http://www.twitch.tv/theearlyaccess/v/8603902>. Sorry but this one really didn't do it for me.

---

To cover up some few thing,

activating this dlc will give you extra inventory space and (correct me if i am wrong) remove chat restriction, expands character slot 6 from 2, and increases the amount of money you can hold by 500. (1500 to 2000)

Does it worth the money? It depends. In my opinion its worth it beacuse it adds more gameplay into the game. But if i were you, i would save even more and have the ultimate edition which will unlock a new weapon, and a new arial mode called skimming along with episodes.

Also this dlc will not unlock water power.

To activate the dlc in-game you need to create a character, finish or skip the tutorial, open market and activate the code there.

8V10. Este juego promete mucho... pero llega a ser tedioso jugar en publicas porque uno consume mucho tiempo e igual me parece un error dejar que uno pueda manejar a 4 inmortales.. Please don't buy and play this game , please.. finally server Sea is heree. no scoped an invisible player with my med kit faster than jfk

8V8. Was having problem starting the game, now it works, is a pretty good game, fun only if you have 3 friends to play.
